

Do you understand your **AWS bill**?

We do! Let's optimize your costs together.

ABOUT US

Labyrinth Labs is a one-stop-shop for DevOps, Cloud, and Kubernetes transforming companies to become cloud native & future ready.

How can you save on your cloud costs?

Plan & Budget

Plan your spending and allocate funds effectively.

Cost Allocation

Divide costs accurately among different teams or projects.

Verify Usage

Don't pay for something you're not even using.

Improve Performance

Identify expensive services or resources and optimize your setup for better performance.

Evaluate Options

Assess if you're getting value for money, explore alternatives, negotiate better terms.

Compliance & Security

Ensure compliance, spot any unexpected usage, and protect against security risks.

Invest in your Growth

By saving money on your AWS bill, you can invest in your business growth and modernize to be ready for the future.

How can Labyrinth Labs help?

80% of companies overpay, lose time to market and end up with technical debt. Become the 20% who don't try to reinvent the wheel. As DevOps professionals, we've been through it all [cost optimizations, cloud platform deployments, SaaSification, cloud migrations & more] and we can do it for you. In return, you'll get a **highly scalable and cost-efficient cloud native platform**, enabling you to focus on innovation and growth.

If you're already down a cloud bill rabbit hole and cannot get out we've prepared a **Spend Smarter workshop** to help you get back in charge of your cloud costs. If you're just at the beginning of your cloud journey and would like to avoid this situation right from the beginning, we'll help you kickoff with **Cloud Kickstart workshop**

1. Spend Smarter: The Cloud Cost Workshop

Cloud cost optimization can be performed on different levels using various techniques. To achieve the optimal costs we'll help you combine them all and especially focus on good architectural design which from our experience is the key to most savings.

- Who's it for?**

Up & Running Start-up / Scale-up / you name it.

- Effort level**

[Fill out this form](#) and let's talk! Simple as that.

- Duration**

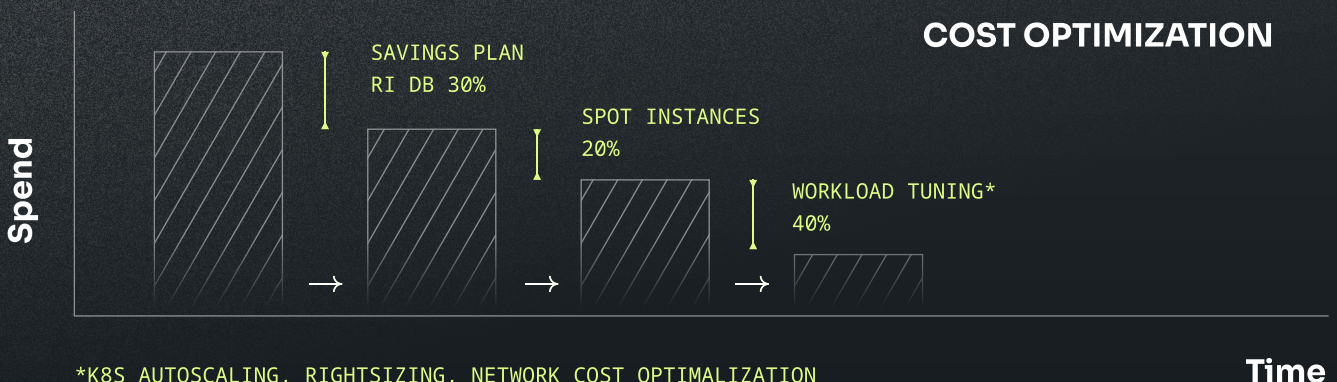

We'll discuss your cost optimization needs in 1h.

- Content**

Let's discuss your needs, understand your bottlenecks and find a reasonable solution together. We'll advise you on how to deal with problems such as CI/CD, Kubernetes, HighAvailability, Observability or anything else to help you optimize your costs and become cloud native.

- Case Study**

See how we optimized cloud costs for [Dataddo](#).

2. Cloud Kickstart: Kicking Off with Cost Efficiency

Free

Starting from scratch with no cloud costs to optimize? We've still got a plan and experience to future-proof your cloud platform to scale efficiently as you grow. As an AWS Advanced partner we can use AWS funding for startups, to help them on their way to become cloud native & future ready. Interested?

- **Company Type**

Up & Running Start-up / Scale-up / you name it.

- **Requirements**

[Fill out this form](#) and let's talk! Simple as that.

- **Duration**

We'll discuss your cost optimization needs in 1h.

- **Place**

Online.

- **Content**

1. Evaluate your current setup & understand business goals
2. Prepare an effective plan on how your company can become Cloud Native together
3. Share our experience with dozens of other startups and provide you best practices & advice

- **Immediate Benefits**

After the workshop, you'll have your Cloud Roadmap ready. It will save you time and effort with your critical business decisions.

- **Case Study**

Here's how we helped [SOFTEC](#) kickstart their cloud journey.
